## DOCK FENDER SYSTEMS

### Rhino Dock Fenders™

- *Proven Durability*
- *No Maintenance*
- *Resilient*
- *Easy to Install*
- *Leaves No Marks*
- *Multiple Colors*

Patent D525721 &  
additional patents pending

### OUR SATISFIED CUSTOMERS:

*"I like the fenders because the rigid triangular shape keeps the boat farther away from the dock than traditional attached dock fenders."* Perry Berg, Clear Lake, Waseca, Minnesota

*"After a complete season of use they look like new, and did an excellent job of protecting my 17 foot Fish n Ski boat and my 24 foot pontoon boat, as well as the dock."*

Walter T. Dieter, Lake Nokomis, Tomahawk, WI

*"With Rhino Dock Fenders, I don't use dock bumpers anymore! Since they stay attached to the dock, I don't have to worry about forgetting to bring them into the boat after launching.... They still look like new and have not shown any wear or fading."*

Jack Holmes, Elk River, Minnesota

*Protection System  
Experts Since 1990!*

## Rhino Dock Fenders™

Patent D525721 & additional patents pending

### Proven Durability

- Laboratory and field tested.
- After a 2000 hour weatherometer test, per ASTM G53, the independent laboratory reported "...samples remain unchanged from unexposed material. All of the exposed specimens remained flexible and showed no signs of cracking."
- The Rhino Dock Fenders are made of materials that have been used outdoors since 1999.

### No Maintenance

- Rhino Dock Fenders will not rust, rot, or require painting.

### Resilient

- The patented triangular design provides strength to absorb multiple impacts and allows the Rhino Dock Fenders to snap back into position.

### Easy to Install

- Flat sides make the Rhino Dock Fenders easy to install.

### Leaves No Marks

- The UV stabilized polypropylene/ polyethylene blend will not leave marks.

### Multiple Colors

- Dock Fenders come in nine standard colors. Mix and match to create any color scheme you wish.

## Rhino Post Covers

As part of the dock fender protection

system, Rhino Post Covers provide added protection as well as improving the look of your dock. Post Covers add a clean, crisp, uniform look to ugly metal poles and provide additional impact protection at the same time.

*"I recommend Rhino Dock Fenders as a simple inexpensive way to protect your dock and boats! They maintain their shape and I have not had problems with them being rubbed off the dock like other dock fenders."*

**Perry Berg, Clear Lake, Waseca, Minnesota**

*"After a complete season of use, Rhino Dock Fenders look like new. I purchased them in my favorite colors – green and yellow. Go Packers!"*

**Walter T. Dieter, Lake Nokomis, Tomahawk, WI**

## Rhino SubSurface™ Graphics Signs

Rhino SubSurface Graphics Signs are perfect for the marine environment. Our multi-color signs come with a **10 year warranty** and will not fade or corrode, even in saltwater.

**Check out the Rhino Storage System at [RhinoTubes.com](http://RhinoTubes.com)**

*Won't roll - great for fishing rods and maps!*
