

# Rhino

MARKING & PROTECTION SYSTEMS

# RHINO TUBE STORAGE SYSTEMS™

*Protection System Experts Since 1990!*

## **Protect Maps & Fishing Rods**

- Tough polypropylene/polyethylene material combined with the patented triangular design prevent maps and fishing rods from being crushed.

## **Water Resistant**

- Protect your maps and fishing rods from the elements. Rhino Tubes are water resistant with one cap fused on.

## **Seven Colors**

- Color code your maps and fishing rods with different color tubes.

## **Easy Access**

- The triangular design allows you to reach into any of the three corners and easily pull out your map. In round tubes maps tend to expand to the outer walls making them hard to remove from the tube.

## **Roll Resistant**

- The flat sides reduce the likelihood that your maps or fishing rods will roll on to the floor or off the boat.

## **Map Tube**

- 3 Sizes: 25", 37", and 43"

## **Fishing Rod Tube**

- Four Sizes: 36", 43", 62", and 72"
